Basic Level (1–30): Basics, Loops, Strings

#	Problem Statement
1	Print "Hello, World!"
2	Sum of two numbers
3	Maximum of two numbers
4	Check even or odd
5	Check prime number
6	Find factorial of a number
7	Fibonacci sequence up to n
8	Reverse a number
9	Palindrome number
10	Count digits in a number
11	Armstrong number check
12	Print all primes between 1 to 100
13	Sum of digits of a number
14	GCD of two numbers
15	LCM of two numbers
16	Swap two numbers without temp variable
17	Convert Celsius to Fahrenheit
18	Check leap year
19	Calculator using functions
20	ASCII value of a character
21	Number to binary, octal, and hexadecimal
22	Sum of first n natural numbers
23	Print star pattern (triangle, pyramid, etc.)
24	Count vowels and consonants
25	Remove punctuation from string
26	Reverse a string
27	Count words in a sentence
28	Capitalize first letter of each word
29	Replace substring in string
30	Find the frequency of characters

'0): Strings, Lists, Dictionaries, Recursion

#	Problem Statement
31	Find second largest element in list
32	Find duplicates in a list
33	Merge two sorted lists
34	Sort list using bubble sort
35	Find common elements in two lists
36	Remove all duplicates from list
37	Find frequency of elements in list
38	Linear search in list
39	Binary search (recursive and iterative)
40	Count even and odd numbers in list
41	Find minimum and maximum in list
42	Palindrome string check
43	Anagram check
44	Check pangram
45	Remove spaces from string
46	Longest word in a sentence
47	Check if two strings are isomorphic
48	Recursive factorial
49	Recursive Fibonacci
50	Recursively reverse a string
51	Power of a number using recursion
52	Sum of digits using recursion
53	Count vowels using recursion
54	Flatten nested list
55	Count frequency using dictionary
56	Most frequent element in list
57	Merge dictionaries
58	Sort dictionary by value
59	Convert two lists into a dictionary
60	Extract unique values from list of dicts
61	Set operations (union, intersection)
62	Find symmetric difference between sets
63	Check subset and superset
64	Count number of matching pairs in a list
65	Convert tuple to list and vice versa
66	Rotate list by k elements
67	Check if list is sorted
68	Find sublist with given sum
69	Generate all substrings of a string
70	Caesar Cipher (Basic Encryption)

00): Algorithms, Data Structures, Logic

#	Problem Statement
71	Kadane's Algorithm (Max Subarray Sum)
72	Two sum problem
73	Longest common prefix
74	Longest palindrome substring
75	Missing number in list
76	Merge intervals
77	Majority element
78	Move all zeros to end
79	Dutch National Flag problem (0s, 1s, 2s)
80	In-place matrix transpose
81	Spiral matrix traversal
82	Pascal's Triangle
83	Subarray with given sum
84	Sliding window maximum
85	Check balanced parentheses
86	Evaluate postfix expression
87	Infix to postfix conversion
88	Valid parentheses combinations
89	N-th Fibonacci using memoization
90	Binary to decimal and vice versa
91	Count set bits in binary number
92	Tower of Hanoi
93	Sudoku board validity check
94	Implement queue using stack
95	Implement stack using queue
96	Detect cycle in a list
97	Find intersection point of two lists
98	First non-repeating character
99	Longest increasing subsequence
100	Dijkstra's algorithm for shortest path
